

Trina Bioreactives AG

# QUALITY POLICY

TRINA Bioreactives AG is committed to delivering quality in the context of cost-stable and reliable supply chain management. “Inner quality” plays a substantial role in many products in the IVD industry, which is not tested but instead relies on trust and professional supply chains.

TRINA Bioreactives AG maintains a quality-focused culture to ensure a high priority is placed on the traceability, safety, and reliability of products.

Our EN ISO 13485:2016 certification is part of our quality policy which is based on the following core principles:

- 1 Department leaders ensure that processes and procedures that affect the quality of our products and services are in place and adhered to.
- 2 All Trina Bioreactives AG personnel have the adequate training, education, skills, and experience to conduct their work competently and in accordance with regulations and Trina’s quality policy.
- 3 Supply chain quality: On time delivery of products and services that match our customers’ manufacturing and R&D planning.
- 4 Cost quality: Stable, reliable and predictable cost, which can be scaled according to the customer’s processes.
- 5 Maintaining robust supplier control and development to ensure stable raw material quality and dependable supply chains.
- 6 Ensuring compliance to requirements and maintaining the effectiveness of the QMS.
